Congratulations on purchasing an RV equipped with the most advanced water management system available today! Be sure to read all Caution and User Instructions on the Nautilus Panel and in your Owner's Manual before performing any operation using the Nautilus Panel System.

NEVER depress check valve on "CITY WATER CONNECTION" with pressure in the line. It will cause irreparable damage to the check valve function.
The Nautilus P2 Panel System will allow you to perform the following functions:

1. Power fill your fresh water tank before remote camping

2. Use your pump to supply water to fixtures from fresh water tank

3. Connect to city water at the camping site to supply water to fixtures

4. Winterize your plumbing lines and fixtures

5. Rinse black tank to help control odors and prevent sewage buildup

6. Connect up to three (3) coax lines with satellite, cable and auxiliary
1. For cable TV connection, connect the threaded coax from the source to the "CABLE" connection.

2. For satellite TV connection, connect the threaded coax from the satellite dish to the "SAT" connection.

3. Consult your Owner's Manual to see if the "AUX" connection has an application.
1. Connect a garden hose to inlet labeled "CITY WATER CONNECTION."

2. **WHITE** diverter handle should be facing down in "NORMAL" position as shown.

3. **BLUE** diverter handle should be facing down in "TANK FILL" position as shown.

4. Turn water on. Fresh water tank should begin to fill.

5. Consult your Owner's Manual for tank capacity. **DO NOT OVERFILL TANK!**

6. When water has reached desired level in tank, turn water off at source.

7. Disconnect garden hose at source before disconnecting from Nautilus panel.
Using System from a Pressurized Water Source "CITY WATER"

1. Connect a garden hose to inlet labeled "CITY WATER CONNECTION."

2. **BLUE** diverter handle should be facing right in "CITY" position as shown.

3. **WHITE** diverter handle should be facing down in "NORMAL" position as shown.

4. Turn on water supply at source. Water should be available to all fixtures.
1. Make sure fresh water tank has necessary supply of water.

2. **WHITE** diverter handle should be facing down in "NORMAL" position as shown.

3. **BLUE** diverter handle should be facing right in "CITY" position as shown.

4. Push "PUMP" switch so that the light on the switch is lit. Select pump switch located on the inside of unit or on Nautilus panel.

5. Pump should run now and water should be available to all fixtures.

6. Make sure pump is turned off when not in use.
1. Connect a garden hose to inlet labeled "WINTERIZE"

2. **BLUE** diverter handle should be facing right in "CITY" position as shown.

3. **WHITE** diverter handle should be facing left in "WINTERIZE" position as shown.

4. Place other end of garden hose in container holding approved winterizing solution.

5. Push "PUMP" switch so that light on switch is lit.
Winterizing Plumbing Lines & Fixtures "WINTERIZE"

6. Pump should be running and winterizing solution should begin to flow through pump into plumbing lines and fixtures. (The pump will run when a plumbing fixture is open.)

7. Open one plumbing fixture, keeping it open until winterizing solution appears, then close.

8. Follow above procedure until all inside and outside plumbing fixtures have been winterized.

9. When all plumbing fixtures have been winterized, push "PUMP" switch so that light on switch is off.

10. Disconnect garden hose from "WINTERIZE" inlet.

** It is normal for some winterizing solution to exit the inlet as hose is being disconnected.
Rinsing the Waste Tank "TANK FLUSH"

1. Connect flexible sewer hose to 4" dump outlet.

2. Open black waste holding tank valve and leave open, allowing tank to drain.

3. Attach a garden hose to inlet labeled "TANK FLUSH."

4. Fully open faucet valve at water supply source (40 PSI minimum) flushing tank until water appears clear in 4" discharge hose.
Rinsing the Waste Tank "TANK FLUSH"

5. Completely close faucet at water supply source.

6. Disconnect garden hose from water supply source.

7. Disconnect garden hose from "TANK FLUSH" inlet.

NOTE: To help debris from clogging tank sprayer orifices, use the Tank Flusher every Time waste holding tank is emptied.
